

Transfer Hinges

2-Pin & 3-Pin

Range: Power management

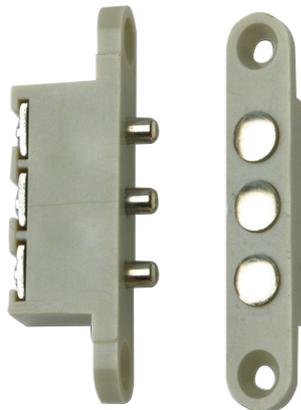

Two models of power transfer hinges, to provide discreet transfer of power/signalling between a door and the frame.

The C2P provides 2 contacts, while the C3P provides 3 contacts. Each contact is spring loaded to ensure a "connection" is achieved each time the contacts close.

The contacts operate up to 3A (resistive & inductive load) at 30V dc, and are ideal for use on swing or sliding doors to provide power/control for electric locks, solenoids etc.

C2P

C3P

Technical specification

Dimensions:

- C2P 70 x 13 x 9mm
- C3P 70 x 13 x 9mm

Contact:

- Voltage 30V dc
- Current 3 Amps
